PROFESSIONAL EXPERIENCE

Banco de México (Central Bank)   *August 2017 - August 2019*
Economist in the Directorate of Economic Studies   *General Directorate of Economic Research*

- Built an algorithm with R that reads Banco de Mexico's policy statements and generates an index of the tone of communication.
- Collaborated in the inflation expectations and financial markets sections for the monetary policy reports that provide timely and appropriate information to the Governing Board for every policy rate decision.
- Briefed the analysis of the evolution of the Mexican Peso and inflation expectations of the Quarterly Reports of Banco de Mexico.
- Analyzed market instruments such as inflation-indexed bonds or swaps of the inter-bank interest rate to obtain implied inflation expectations, risk premium and expected target rate.
- Estimated the effects of every monetary policy decision on the intra-day Mexican peso from the period of 2008 to 2018.

AutoTodo Mexicana   *January 2017 - July 2017*
Data Analyst   *E-commerce Department*

- Estimated the potential domestic demand for Mexican Auto-parts in the E-commerce scope.
- Designed the structure of a website traffic report through Google Analytics in order to track the users that get into the new E-commerce website of AutoTodo.

Mexican Institute for Competitiveness (IMCO)   *January 2016 - August 2016*
Social Service Analyst   *Development of Economic Indexes*

- Collaboration in the report of Mexican States Competitiveness Index 2016 in the compilation, cleaning, and analysis of databases and calculation of economic and social indicators from official and public sources.
- Documented surveys and interviews of medium and small export enterprises for a research project that assessed the impact of corruption in private investment.
